Date: _____

Lesson 5: Handout

Gotta-Have-It Checklist: Magnetic Forces

Instructions: Use your Model Tracker and your science notebook to make a checklist of the most important ideas you need to make a model showing how the magnet and wire work together to move the speaker.

What our model needs to have to answer the question, "How do the magnet and the wire work together to move the speaker?"	<i>Check off pieces of the model as you use them.</i>	
	<i>used</i>	<i>did not use</i>
1.		
2.		
3.

8.		
9.		
10.		

Use your checklist to make a new model for answering the question. As you use ideas from your checklist, put a check in the "used" column and label the concept on your model with its row number from the checklist. If you do not use an idea after all, place a check in that column.
