Community Stakeholders

Part 1. Identify the stakeholders and their needs for responding.

Consider the following:

- Who are the people that live in places where tsunamis might happen?
- Will they need special assistance in an emergency? Describe those needs.
- Who can assist them?

Who is this community member? Stakeholders	Will they need special assistance in an emergency?	Describe their needs.	Who can assist them?
	<input type="checkbox"/> yes <input type="checkbox"/> no		
	<input type="checkbox"/> yes <input type="checkbox"/> no		
	<input type="checkbox"/> yes <input type="checkbox"/> no		
	<input type="checkbox"/> yes <input type="checkbox"/> no		

Part 2. Define the Problem and the Goals of a Hazard Communication System.

What is the problem that engineers are trying to solve when they develop hazard communication systems?

What would that system need to do to address all the needs of the community stakeholders?

--

Part 3. Identify the specific Criteria and Constraints for Communication Systems.

Identify Criteria What <i>must</i> the system be able to do to be effective?	Why is this an important criteria?

Identify Constraints What might limit what is possible in the communication system?	Why is this constraint important to consider? Is there a particular stakeholder group that we should consider?
