

# Where can oil palm trees grow?

Instructions: Color in places around the world that meet the needs of the oil palm plant.

- First, color in places that meet the oil palm's temperature needs.
- Use a new color for places that meet the oil palm's sunlight needs.
- Use a third color for places that meet the oil palm's precipitation needs.
- Add a key to your map for each of the three colors.
- Circle where the colors overlap showing where oil palm can grow.
