## Initial Models Gallery Walk

For each model that you visit, fill out one of the rows of the table. If you visit more than four models, write below this table.

What pattern is the model trying to explain?	What parts, movements, and interactions are represented in the system?	Where would you have to be to see the system from that perspective?

Use the table on the other page to fill out the T-charts below and identify similarities and differences.

Parts		Movements and Interactions		Perspectives	
Similarities	Differences	Similarities	Differences	Similarities	Differences
